PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 10+ years of experience designing and delivering scalable web, mobile, and backend systems. Specialized in Angular, React.js, Next.js, Spring Boot, NestJS, Flutter, Ionic, and Django. Strong expertise in real-time communication (WebRTC), fintech platforms, enterprise applications, Domain-Driven Design (DDD), Test-Driven Development (TDD), and AI/ML with Python and PyTorch. Proven track record of building high-performance, secure production systems and collaborating with international agile teams.

TECHNICAL SKILLS

Frontend: Angular, React, Next.js, Ionic, NgRx, NGXS, Redux, Zustand

Backend: NestJS, Fastify, Spring Boot, Express, Python, Django, C#, .NET

Mobile: Flutter, Ionic

Databases: MongoDB, PostgreSQL, Redis, Entity Framework Core, LINQ

DevOps & CI/CD: Docker, Kubernetes, Jenkins, GitLab CI, GitHub Actions, Ansible, Azure, GCP

Architecture & Practices: Domain-Driven Design (DDD), Test-Driven Development (TDD), Microservices, Clean Architecture

Web3: Solidity, Hardhat 3

AI / ML: PyTorch, Neural Networks, NLP, LangChain, LLM

PROFESSIONAL EXPERIENCE

Full-Stack Developer 2023 – 2026

Total-E-Integrated | Canada (Remote)

- Contributed to a large-scale management system for golf clubs serving enterprise clients.
- Designed modular and reusable front-end architecture using Angular and back-end architecture using .NET, improving maintainability and development speed.
- Implemented complex UI components and optimized user experience across the platform.
- Collaborated within an international agile team following Scrum practices.

Full-Stack Developer / Full-Stack Developer 2023 – 2024

Next Top Tech | Dubai (Remote)

- Delivered multiple web and mobile solutions across tourism, fintech, and SaaS domains.
- Built a tourism reservation platform targeting Cyprus and Dubai markets using Angular and NestJS.
- Developed high-reliability fintech systems (Voucherry, TopChange) with strong focus on security and uptime.
- Designed and implemented scalable backend systems using NestJS and SpringBoot.

Full-Stack Developer (Freelance) 2014 – Present

Independent / Multiple Clients | Remote

- Developed and maintained scalable enterprise Angular and Ionic applications for diverse clients.
- Built real-time messaging and video calling systems using WebRTC, STUN, and TURN servers.
- Published a lottery smart contract on ERC-20 using Solidity and Hardhat.
- Developed a sample crypto wallet application with Flutter (mobile), Spring Boot (backend), and PostgreSQL.
- Applied Domain-Driven Design (DDD) and Test-Driven Development (TDD) practices on multiple enterprise projects.
- Designed and trained AI algorithms using neural networks, NLP techniques, and PyTorch.

EDUCATION & LANGUAGES

Master's of Artificial Intelligence (GPA 3.5) 2020 – 2024

AZD University

English (Fluent) | German (B2)
